

DomainTest.userTest.setAddressTest

```
graph LR; A[DomainTest.userTest.setAddressTest] --> B[supermarket.domain.User.getAddress]; A --> C[supermarket.domain.User.setAddress];
```

The diagram illustrates a test method, `DomainTest.userTest.setAddressTest`, which is highlighted in a grey box. Two blue arrows originate from the right side of this box, pointing to two separate white boxes on the right. The top white box contains the text `supermarket.domain.User.getAddress`, and the bottom white box contains the text `supermarket.domain.User.setAddress`. This suggests that the test method is designed to verify the behavior of both the `getAddress` and `setAddress` methods within the `supermarket.domain.User` class.

supermarket.domain.User.getAddress

supermarket.domain.User.setAddress
